THE LEDGER'S judgment is that after today's municipal election in Cincinnati Mr. INGALLS will hardly be suitable "timber" for a crosstie, much less for the Presidency.

SINCE she became a Republican state, wonderful changes have been wrought in West Virginia. Railways have been built, mines opened, factories established, towns and cities have sprung up everywhere; and now the hens at clifton Forge are laying eggs 734×81/2 inches in diameter. Republicanism always means progression.

THE demand for locomotives is increasing, all the great systems being short of motive power. The American Locomotive Company now has 16,000 men employed in its eight plants, and has orders ahead for 600 locomotives. The statement of President CALLAWAY shows that the Company has expended \$3,000,000 since 1901 on shop improvements. The earnings for the past nine months were \$23,956,345. The employes are working night and day to get out the orders now on hand.

COLONEL JACK CHINN was leading the strenous life in Cincinnati for a few days. First, he attempted to annihilate Attorney THEODORE HALLAM -and failed. Then, a couple of Constables made a raid on his room in the Gibson House, in an effort to collect a bill of \$72.25 which the Colonel owed a Cincinnati firm. The Colonel was a-bed, but the officers managed to secure his machine gun, and they tore his nighties in restraining him from making bologna sausage of them with his Bowie-knife. The next breeze that sweeps across the Ohio may bear upon its wings the news that the Colonel is walking down Fourth street waving the scalps of the entire police force high in the air.

A Story Worth Telling

We never tire of telling the story of Uneeda Biscuit. We do not believe that lovers of good, wholesome food ever tire reading it. .

Uneeda Biscuit are the result of two ideas. That soda crackers could be made better than they had ever been made before. That it was possible to convey them to the home fresh, crisp and clean.

The importance of the soda cracker as an article of daily consumption, made this worthy of extraordinary effort. True, many people laughed at the idea of so much thought-timelabor—capital, being devoted to a soda cracker. But the greatest industries of the greatest country in the world have been developed from smaller things than a soda cracker, and so it seemed worth while to make the best soda cracker that could be made and to place it on the table as good as it had been made.

To do the first required the selection of the best materials, of the best equipment, the highest skill. To do the second upset all traditions. The oldest bakers said there was no way to keep a soda cracker good.

That no one expected it any way. That people were satisfied to eat them stale, as they had been in the habit of doing. And so it fell to the lot of younger minds to do this unheard of thing-to keep a soda cracker good until eaten.

The result was the creation of the In-er-seal Package with red and white seal. An invention that kept out the air, moisture, dust germs, that first retained the natural flavor of the biscuit, keeping it crisp and fresh until it reached the table, and so Uneeda Biscult became a reality. The little . thing that seemed hardly worth while became a great thing that seemed hardly possible.

To-day over 300,000,000 packages have been consumed by the thoughtful people of this country and the demand is ever increasing.

That is the story of Uneeda Biscuit. Some day we will tell it over again for the benefit of those who are still "satisfied" with the stale and broken crackers that come

in a paper bag, when they can get Uneeda Biscuit whole, fresh, and clean.
